## Profile

I have 10 years of experience in web development and graphic design. During my free time, I work as a freelance web developer, graphic designer, and digital marketing. After moving to Stockholm I have founded a start-up company that mainly focuses on graphic designing and Web Development. It is called Umakue: web and design. It provides a platform to build and develop the web for start-up companies.

I'm looking forward to advancing my skills by collaborating and working with a well-known company. I am open to ideas that bring challenges and enable me to showcase my talent. I like to create a new design that stands out among others while keeping it simple and elegant.

To bring ideas to the table and discuss them among the team and deliver a customer satisfactory design is my main focus. It brings me joy and happiness. I am open to every possible opportunity where I can learn and advance my skills from experienced and competent peers.
